DETAILED ACTION

This application has been examined. The original claims 1-34 are pending. The examination results are as following.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-30 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Liao et al. (US patent 5,988,902) in view of Gerpheide (US patent 6,507,338)

Liao et al. disclose in figures 1-2 that an electronic device or the method comprising a housing having at least one outside edge; at least one touchpad; and a user input detector (that is detected by touch pad 42, see column 5, lines 35-36) electrically or trip coupled to the touchpad, wherein the housing comprises a display having a display screen (28); the touchpad serves as a second input device for controlling the scrolling (see column 3, lines 65-67 and column 4, lines 1-4); and wherein the touching comprises using tactile feel to position the fingers (see column 5, lines 23-24. However, Liao et al. do not disclose that the touchpad disposed along at least a portion of the outside and perimeter along the at least outside, and outside corner edge is rounded Gerpheide discloses in figure 4A that an input device having a touchpad (60) having touchpad surface (62) is divided onto two regions, and having a perimeter, and corner edge is rounded. It would have been

Art Unit: 2674

obvious to one of ordinary skill in the art at the time the invention was made to utilize the teaching of Gerpheide with the touchpad surface (62) and having a perimeter and rounded to the outside edge of the system device as taught by Liao et al. because this would help the user can touch any portion of the outside edge of the electronic device.

Allowable Subject Matter

3. Claims 31-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

None of the cited art teaches or suggests that the touchpad input device of claims 25 comprising an analog-to digital converter electrically coupled between the user input detector and the control circuit for converting electrical signals into digital information readable by the control circuit or further comprising a threshold comparator electrically coupled between the user input detector and the control circuit or an electric signal amplifier electrically coupled between the user input detector and the control circuit.

Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimnhung Nguyen whose telephone number (703) 308-0425.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, RICHARD A HJERPE can be reached on (703) 305-4709.

Any response to this action should be mailed to:

Application/Control Number: 09/845,552

Art Unit: 2674

Commissioner of Patents and Trademarks

Washington, D. C. 20231

Or faxed to:

(703) 872-9314 (for Technology Center 2600 only).

Hand-delivery response should be brought to: Crystal Park II, 2121 Crystal Drive, Arlington, VA Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 2600 Customer Service Office whose telephone number is (703) 306-0377.
